IHEALTH AIR - WIRELESS PULSE OXIMETER

CODE:
PO3M

DESCRIPTION: See how your activity affects your oxygen level and pulse pre and post workout. Accurately measure your blood oxygen level, pulse rate, and perfusion index with our wireless pulse oximeter. Clinically tested. Simultaneously track those results with iHealth's free mobile health app.

IHEALTH WAVE - CONNECTED FITNESS TRACKER

CODE:
AM4

DESCRIPTION: The iHealth Wave connected fitness tracker will accompany you all day long. Wake up gently each morning with its vibrating alarm and prepare for a day full of activities. Motivate yourself by reading your results directly on the screen or on iHealth's free mobile health app. Connectivity: Bluetooth 4.0 BLE, Waterproof 30m with a battery lifetime of upto 3 years.

PORTEX COACH 2[®] 4000 - 4,000ml

CODE:
RESP-M2

DESCRIPTION: it can accommodate virtually any patient. Reduces the possibility of contamination. Provides immediate patient feedback. Easy to train. Reduces the chance that the. Setting will be changed inadvertently

PORTEX MALLINCKRODT RESPIRATORY

CODE:
RESP-M1

DESCRIPTION: incentive flow rate spirometry made simple and easy. The number of coloured balls raised and the length of time they are kept suspended provides visible proof of the patient's progress. The maximum volume inspired per second is shown on each chamber and gives an accurate guide to flow rate. Requires minimum instruction and minimum supervision. Supplied clinically clean and individually wrapped. Single patient use

PIC AIRCLINIC AEROSOL

0470

DESCRIPTION: ideal aerosol for daily use. AirClinic is equipped with a double-piston motor for continuous use, allowing for treatment cycles that do not require pauses for cooling the equipment. AirClinic is equipped with the innovative and exclusive Airfast phial, which allows for a deeper penetration of the medication within the airways, and extremely fast nebulisation. The Airfast phial nebulises 20% more effective particles in the airways compared to conventional phials and in half the time. They are CE 0470 medical devices. Carefully read the instructions before use

AMBU RES-CUE MASK

DESCRIPTION: in CPR, mouth-to-mouth has been the traditional way of ventilation in an emergency situation. With the Ambu Res-Cue mask first responders can provide immediate respiratory support without having any concerns about infectious diseases and the inherent unhygienic nature of the practice thus removing any natural reluctance to carry it out
